

One man changing the course of a nation!

Can you can imagine what it must be like to have such power that you alone could change the destiny of a whole nation? This is power that men have dreamed about since the days of Alexander the great and Hitler.

Yet the Bible is very clear that Amos who was a minor prophet by the way, prayed to God when the Lord pronounced judgment over the whole nation and twice not once God heard his voice, regarded his words, and relented, or changed his mind about the devastation he was about to bring.

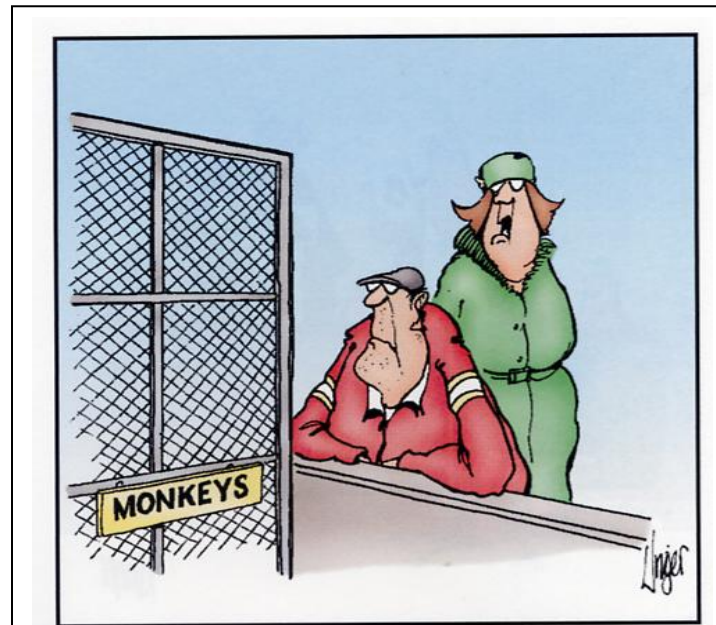

The first judgment was locusts that were going to devour the whole nation's crop, and leave them for a year without food. The second judgment was worse, a fire from the great deep was going to come and devour the land and everything in it.

No small thing these judgments, they were going to literally eat up Israel except for one thing. One man stood in the way. The audacity, the brazenness to think that you alone could make a difference. Yet Amos moved directly between God and the nation and pleaded for them, giving no defense for their sins except to say that they were a "small people". God not only heard the prayer of Amos but he honored it, disaster was averted for the time being.

What does this say to you and me?

**Get on your prayer bones and lift those petitions to God! Start believing again, if you really believed you would be storming the halls of heaven everyday!*
**Prayer is more honored by God than by us! Never do you make a bigger difference than when you pray to a God with all power!*
**Take all limits off of your prayer! If you pray and believe, God will change the course of America!*
**Never forget the love and honor God attaches to those who seek him. To me greater than what He does for me is who He is to me!*
